### PROJECTS

#### AR- Watch Try On

Aug 2020 - Present

I have been trying my hands on unity and augmented reality. So I have created a Watch-Tryon app using Unity and Vuforia engine which helps the user to try on various watch models in different colors to see which suits them the best.

#### Covid-19 India Tracker

Jun 2020 - Present

<https://aakashmangla2000.github.io/Covid-19-India-Website/>

We created a website with real-time statistics on Covid-19 cases in India. The counts are state-wise and displayed through tables, charts, news, and maps. The website is responsive and works on all types of devices.

#### NASA MARS ROVER

May 2020 - Present

<https://mayankhotchandani.github.io/Mars-Rover/index.html>

Project description created a web app using API from NASA which gives the feed of images taken by NASA's Mars rover.

We can also track the current position of ISS

#### ATTAC

Jan 2020 - Present

This project is an improvised design to purify the air.

#### Tre-Way

Oct 2019 - Present

<https://tre-way.web.app/login>

Tre-way is a web app made by using modern technologies like react.js, node.js, Google firebase e.t.c Through Tre-way we are going to handle 3 main problems faced in modern cities these days -

1. Pollution
2. Traffic
3. Parking

#### Classic Apple iPod

Sep 2020 - Present

<https://ipod-47183.web.app/>

An attempt to recreate the Classic Apple iPod for fun using technologies like React.Js and Firebase
